## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 – 2, 4 – 5, 7 – 11 and 14 – 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 5,452,433 to Nihart et al. in view of applicant's admitted prior art (hereinafter referred to as APA).

As to claim 1, Nihart teaches a Common Information Model (CIM) Object Manager (Common Agent 130, Common Agent Library Routine 160, Col. 6, Ln. 17 – 33), a Host Computer (Local Computer System 120), CIM Repository (Location Directory Process 162, Col. 6, Ln. 17 – 33), a Connection (“...remote procedure call (RPC)...”, Col. 9, Ln. 53 – 67), a Protocol Indicator (“...a handle...”, Col. 6, Ln. 17 – 33), a Protocol-Specific Object (Step 206, figure 10, Ln. 28 – 39) and returning a protocol-specific object (“...returns a list of...”, Col. 10, Ln. 33 – 39).

Nihart is silent with regards to a repository application programming (API).

APA teaches a Repository Application Programming (API) (Local Interface/Connection 28, figure 10). It would have been obvious to apply the teaching of APA to the system of Nihart. One would have been motivated to make such a modification in order to provide a plurality of operations on a repository.

As to claim 2, Nihart teaches a Method (“...call...”, Col. 6, Ln. 19 – 29), transmitting (“...call...”, Col. 6, Ln. 19 – 29) and a Result (Step 212, Step 214, Col. 10, Ln. 46 – 57).

As to claim 4, Nihart teaches the CIM repository to be resident on the host computer (Computer 110, Computer 120, Col. 4, Ln. 42 – 52).

As to claim 5, Nihart teaches the CIM repository to be resident on a separate computer (Computer 110, Computer 120, Col. 4, Ln. 42 – 52).

As to claim 7, Nihart teaches a CIM Repository Database (Location Directory Process 162), a CIM Object Manager (Common Agent 130, Col. 6, Ln. 17 – 33), a Protocol Indicator (“...handle...”, Col. 6, Ln. 17 – 33), Program Code (Library 160, Col. 6, Ln. 17 – 33), a Factory Class (Root Node 182, Col. 6, Ln. 34 – 53), a First Class (Node 172, Col. 6, Ln. 34 – 53) and a Second Class (Node 172, Col. 6, Ln. 34 – 53).

Nihart is silent with regards to a repository application programming (API). APA teaches a Repository Application Programming (API) (Local Interface/Connection 28, figure 10). It would have been obvious to apply the teaching of APA to the system of Nihart. One would have been motivated to make such a modification in order to provide plurality of operations on a repository.

As to claim 8, Nihart teaches a Method Call (Call 132, Call 134, Col. 5, Ln. 44 – 51, Col. 8, Ln. 22 – 31), a Management Application (Management Tool 102, Col. 5, Ln. 44 – 51, Col. 8, Ln. 22 – 31).

As to claim 9, see the rejection of claim 4.

As to claim 10, Nihart teaches a Network Connection (“...remotely located from computer 120”, Col. 4, Ln. 42 – 53).

As to claim 11, see the rejection of claim 3.

As to claim 14, see the rejection of claim 1.

As to claim 15, see the rejection of claim 2.

As to claim 16, see the rejection of claim 3.

As to claim 17, see the rejection of claim 6.

3. Claims 3,6 and 12 – 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 5,452,433 to Nihart et al. in view of APA as applied to claim 7 above, and further in view of Ismael et al.

As to claim 3, Nihart as modified in claim 1 does not teach a LDAP, JDBC or JAVA.

Ismael teaches a LDAP, JDBC or JAVA (Java RMI System, Col. 12, Ln. 1 – 4).

It would have been obvious to apply the teaching of Ismael to the system of Nihart. One would have been motivated to make such a modification in order that java management application can interact with an agent, regardless of the communications protocol (Col. 12, Ln. 7 – 10).

As to claim 6, Nihart as modified in claim 1 does not teach calling JAVA Factory Class.

Ismael teaches calling JAVA Factory Class (“...Java classes...”, Col. 14, Ln. 28 – 31). It would have been obvious to apply the teaching of Ismael to the system of Nihart. One

would have been motivated to make such a modification to enable a Java management application to access an agent using Java remote method invocation.

As to claim 12, Nihart as modified in claim 7 teaches a Different Protocol (“...multiple management protocol...”, Col. 2, Ln. 10 – 14).

Nihart as modified in claim 7 is silent with reference to a plurality of CIM repository.

Isamael teaches a Plurality of Repository (Core Management Services 25, 26, 27, 28). It would have been obvious to apply the teaching of Ismael to the system of Nihart. One would have been motivated to make such a modification in order provide different repository for different protocol objects.

As to claim 13, see the rejection of claim 5.

**The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.**

**INFORMATION ON HOW TO EFFECT DRAWING CHANGES**

**1. Correction of Informalities -- 37 CFR 1.85**

New corrected drawings must be filed with the changes **incorporated** therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

**2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.**

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

**Timing of Corrections**

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
